Project Description:

Based on the Loan Agreement signed between the PLO and the IFAD, the Participatory Natural Resources Management Programme (The PNRMP) would seek to fulfill its objectives through addressing constraints in Land Reclamation and Improvement, and Institutional Support. Land Reclamation and Improvement includes a comprehensive set of measures to bring idle or marginally productive land into a condition where higher levels of production and productivity would be possible. Investments include rock clearance, construction or repair of terraces, fencing, construction of wells and water collection cisterns and the construction or improvement of farm access roads.

Objectives:

Land and water development and use providing tangible income to the socio-economic well-being of targeted communities

Locations:

Districts north of West Bank : Tulkarem, Jenin, Nablus, Qalqilia, Ramallah, Salfit

Products (as of end – May 2006):

- Development of 1,943 dunums of land
- Constructing 237 water cisterns
- Constructing 180 km of Agricultural Roads
- Planting of 77,720 fruit trees

Outputs:

- Land reclamation and improvement
- Improved crop productivity
- Capacity building for MoA PMU
