Project Description:

The project two main components are the construction of a treatment plant and sewage lines in Khan Younis Governorate. The project will also support the development of detailed designs for the treatment plant and the complementary parts of the sewage network.

Objectives:

1. To improve the environmental health conditions in the area of Khan Younis through the provision of a comprehensive sewage network.
2. To create job opportunities for unemployed through the adoption of labor intensive.

Locations:

Governorate of Khan Younis

Products (as of end – May 2006):

- Up to date, 40% of the main pressure line construction activities were completed.

Outputs:

- The Khan Younis main pressure line is to be constructed.
- Waste Water Treatment Plant is to be constructed.
