| Validity of Quotation | □ 30 DAYS ✓ 60 DAYS |
| Preliminary Examination - Completeness of quotation. | □ Partial bids permitted. ✓ Partial bids not permitted |
| Warranty/guarantee conditions: | According to standard guarantee conditions prevailing in the market |

## REQUIREMENTS

Requirements for Bids, Evaluation of Quotations, and Awarding Criteria:

1. The Evaluation Committee will examine the quotation to determine whether they are complete, whether the documents have been properly signed, whether the offer complies with the terms and conditions, and whether the proposed make and quality is in conformity with UNDP standard. Therefore, bidders should submit full technical proposal along with their financial offer for the committee to be able to rank their bids.

   Arithmetic errors will be corrected according to the following principle; if an error in a sub-total of an item is detected as a result of a mis-calculation in the multiplication of the unit price by its respective quantity, then the unit price shall prevail and the sub-total shall be corrected accordingly; if a bidder does not accept the correction, his quotation will not be considered for further evaluation; and if there is a discrepancy in the grand-total between words and figures, the amount in words will prevail. Only responsive bids will be considered for evaluation. The contract will be awarded to the lowest bidder whose offered product is found compatible with UNDP standard.

2. All prices shall be quoted in US dollars or any other exchangeable currency, including NIS shekels.

3. Bidder can quote for more than one option. All options will be considered for evaluation and will be looked at as different quotations.

4. Bidder is required to include in his offer(s) all necessary supporting documents stipulating the curves and data of the pump(s), the features and origin, as well as proof of his capacity for the after sale service of such type of pumps. These documents should be submitted as part of the bid and shall form the basis of the bidder's technical proposal, by which the technical committee can evaluate the quality of the product(s) and the expected after sale service.

5. Prices Must not include VAT since the UN is exempted from all kind of taxes. Any bidder from the West Bank Must provide "VAT Clearance" from his respective VAT office, along with a "Proforma Invoice".
